

multiscale::Geometry2D  
::lineCircleTwoIntersectionPoints

```
graph LR; A[multiscale::Geometry2D::lineCircleTwoIntersectionPoints] --> B[multiscale::Geometry2D::inverseTranslate];
```

A diagram showing a call to the function `lineCircleTwoIntersectionPoints` within the `multiscale::Geometry2D` namespace. The call is represented by a grey rectangular box with a black border. A blue arrow points from this box to another box on the right, which represents the function `inverseTranslate` within the same namespace.

multiscale::Geometry2D  
::inverseTranslate
