

multiscale::Geometry2D  
::lineCircleOneIntersectionPoint

```
graph LR; A[multiscale::Geometry2D::lineCircleOneIntersectionPoint] --> B[multiscale::Geometry2D::inverseTranslate]
```

A diagram showing a call to the function `multiscale::Geometry2D::lineCircleOneIntersectionPoint`. The call is represented by a grey rectangular box with a black border. A blue arrow points from this box to another box on the right, which represents the function `multiscale::Geometry2D::inverseTranslate`.

multiscale::Geometry2D  
::inverseTranslate
